How to set up restrictions on iOS

You can apply restrictions to iOS devices (iPhone & iPad) to limit the use of certain features such as the browser, camera or app store.

To set up these restrictions you go to the "Settings" app and from there select "General".

Settings				
≁	Airplane Mode	\bigcirc		
?	Wi-Fi	RMG-Systems	>	
*	Bluetooth	Off	>	
(⁽ A))	Mobile Data		>	
ଡ	Personal Hotspot	Off	>	
	Carrier	EE WiFiCall	>	
	Notifications		>	
	Control Centre		>	
C	Do Not Disturb		>	
\bigcirc	General		>	
AA	Display & Brightness		>	

Then you're looking for "Restrictions.

Settings General		
About		>
Software Update		>
Siri		>
Spotlight Search		>
Handoff & Suggested Apps		>
CarPlay		>
Accessibility		>
Storage & iCloud Usage		>
Background App Refresh		>
Auto-Lock	2 Minutes	>
Restrictions	Off	>

Once there you will need to select the "Enable Restrictions" options.

く Ge	neral Restrictions				
Enable Restrictions					
ALLO	V:				
>	Safari				
Ô	Camera				
Ų	Siri & Dictation				
	FaceTime				
	AirDrop				
C	CarPlay				
	iTunes Store				
,	Apple Music Connect				
	iBooks Store				
	Podcasts				

This will require a 4 digit passcode to switch on and off so the kids can't simply disable the restrictions.

	Set Passcode	Cancel				
Enter a Restrictions Passcode						
1	2 ABC	3 Def				
4 бні	5 JKL	6 ^{MNO}				
7 PQRS	8 TUV	9 wxyz				
	0	$\langle \times \rangle$				

Once this is complete your kids won't be able to see the apps from the home page but also it will stop them from using apps such as the camera from within other apps like Instagram.

Please note, these screen shots are taken from an iPhone on iOS 9.2.1 so the look and position of the settings might differ very slightly depending on device and operating system version.
