

KTC Phonics

St Winefride's uses the Knowledge Transfer Centre (KTC) programme of phonics. It is a comprehensive teaching scheme that encompasses learning how to say a sound, write a sound, name a sound, read sounds within words and sentences then write words and sentences using the sounds learnt. This is taught twice a day within Early Years, Year 1 and Year 2. Children are taught using an individualised approach to learning, so each child is accessing learning at their current level.

We use KTC not only to teach the sounds of our language, but through early reading and writing, embedding the process and generating high confidence within the children. Our process is fun and the children's outcomes reflect this.
